InduSoft Wins Control Engineering's Engineer's Choice Award Indusoft Web Studio V6.1 wins in HMI Software category

Austin, TX – April 26, 2007 – The first time Control Engineering magazine let readers vote for its awards, InduSoft Web Studio V6.1 won in the HMI Software category. The awards, previously known as the Editor's Choice awards were chosen by Control Engineering editors.

“We are extremely pleased by this award, because it demonstrates an amazing loyalty on the part of our customers—and we really want to thank them for that.” says Marcia Gadbois, Vice President of Business Development at InduSoft. “Control engineers who have vast experience with our product have spoken for the first time. Their votes verify what we have been saying all along: InduSoft Web Studio is the most comprehensive, useful, and easiest to use HMI/SCADA software available for automation and process control.”

Control Engineering subscribers were asked to select winners based on three criteria:

- Service to the industry (usefulness)
- Technological advancement (innovation)
- Market impact (would buy it tomorrow if I could).

Winners in 2005, chosen by Control Engineering editors, included National Instruments, Rockwell, Honeywell, and Wonderware. This year, when readers were asked to vote, InduSoft Web Studio took the prized endorsement.

###

About InduSoft

Founded in 1997, InduSoft provides a powerful family of industrial software products for developing applications in industrial automation, instrumentation, and embedded systems for all Microsoft-supported operating systems. InduSoft develops tools and technologies that empower people and companies to develop graphical interfaces for embedded PCs, PCs, and mobile devices to highly redundant systems. Today more than 20,000 InduSoft HMI, SCADA, control and data acquisition systems are operating worldwide.
